

Mines of the County

S. W. Hollis an expert mining man went out to Mineral Park yesterday to examine the Kay mine. The property was recently discovered and has a big showing of copper.

Adam Mason, who has a number of mining prospects in the country near Cedar, was a Kingman visitor this week. Mr. Mason believes that section is sure to become the big producer of the county within the next few years.

L. Hoffman, manager of the Arizona Southwestern Copper company, came up from the property yesterday. He reports that the mine is opening up well and that the mill is fast approaching completion.

M. N. Honeywell was over from Cerbat a few days ago attending to important mining business. He reports that the Gold Bar mine, lying west of the old Flores, is about to be taken over by Pasadena people and that a deep shaft will be sunk on the property.

B. K. Morse returned a few days ago from Goldroad, where he examined properties around the district. He will probably leave here early next week for Cuba, where he will supervise the working of a large copper property. Mr. Morse was at one time at the C. O. D. mine, when Henry S. McKay had an option.

The mill of the Frisco Gold Mines company, at Union Pass, is expected to start up today. The plant has been overhauled and large additions to its capacity have been made. More than double the quantity of ore heretofore handled by this plant will be put through, which will bring it up among the big producing properties of the county.

A. C. Werden, who has a bond on the mining property of E. A. Shaw, W. H. Welch and A. deSaalmard, at Goldroad, has opened a splendid showing of gold ore at a depth of 150 feet. The west drift on this level is in ore, one foot of which has shown big values along 60 feet to the breast. Mr. Werden has carried on systematic work on the mine and expects to open a big property.

A report comes from Gold Road that a great strike has been made in the Gold Road mine, the find being on the 700 level. It is also said that rich ore has been found on the 900 and that a drift is now being run on that level to open the ore body. Practically every opening now shows high grade milling ore. Number three shaft is also in ore and all drifting east of that shaft is showing high values.

On the 900 level of the Tennessee mine, at Chloride, and 30 feet north of the shaft a five foot streak of solid ore has been opened for some distance.

This ore body has been gradually increasing in value and when the old ore shoot is reached it is believed that one of the greatest ore shoots ever found in that property will be opened. The mine is said to be looking better than ever since it passed into the present ownership. Large shipments are now going forward from the property to the Needles milling plant.

E. M. Campbell, of Los Angeles, a well known mining man and one of the big investors in the Boundary Cone Gold mines company, was a Kingman visitor last Wednesday, having come in from the mines. He reports that the drift from the 520 level is in splendid ore, the body having a better general grade than on the level above. While the shoot containing the rich deposit has not yet been reached splendid values in gold are found all along the level. From indications it is his opinion that the mine is sure to be one of the big things of the Tom Reed section.

W. S. Hutchinson, of the Vulture Mining company, operating the old time bonanza mine, near Wickenburg, spent a couple of days this week investigating the old Hackberry mine, coming on to Kingman Tuesday last and going out to Stockton Hill the following day to examine the Cupel and de la Fontaine mine. Anson H. Smith accompanied him to the properties. Mr. Hutchinson spent several weeks in this county some years ago, having examined the Catherine mine, at Pyramid for S. C. Bagg. He reports the Vulture opening up big and that it is sure to be one of the greatest gold mines of the state.

Mining in Northern Mohave

Chris Vogt arrived in Kingman a few days ago from his ranch near Gold Butte, and reports that that section of Nevada and Arizona is becoming quite prosperous from a mining standpoint. The Grand Gulch company is shipping a large tonnage of ore to the railroad, at St. Thomas, the hauling to the Virgin river being by truck, whence it is hauled across the river to the railroad by team. It is probable that a bridge will be built across the river at St. Thomas and the railroad may be continued to the mine in Grand Gulch. The ores from this mine are being assayed to twelve per cent or better, below which it would not pay to send to the smelter. A great deal of the ore now being taken from the mine runs to thirty-three per cent and better. The lower grades that are being sent to the smelter is from the cobbings and dump ores left from the shipments that were sent to Salt Lake City by way of St. George.

The Copper Mountain Mining company, in the Buckskin Mountain region, is shipping a considerable tonnage of ore by way of the Grand Gulch. The haul is something over eighty miles and takes more than a week to make the round trip by team. The ore is said to have a value above sixty per cent copper, and also carries values in gold and silver. These veins are on a contact between sandstone and lime and lays in kidneys of rich copper. The mines have recently been taken over on bond by a company that is said to be well financed. Along the belt, which is thought to be an extension of the United Verde, there are many outcrops of copper through the sandstone and limes. The ore in every instance is rich oxides and carbonates.

In the Virgin range several mines are now being worked and the ores shipped to the smelters. The bodies are not large, at least this may be said of the richer part of the veins, but contact with the granite and lime has been reached and the general opinion is that great bodies will be found below the level of contact. Above that level the ore was found in the lime and sandstone, the workings being at the 300.

With the extension of the railroad into this county a great country would be opened up, there being gold, copper, lead and silver, while in many places a good grade of mica is found. Along the Virgin there are many deposits of spodumene crystals that could be used in the place of jet; and close to the river is the great salt deposit that has furnished Utah's Dixie with its salt for fifty years. Immense gypsum deposits are along the river for thirty miles and of great depth. With the entry of capital and the opening of the country by railroad that section would become one of the richest in the southwest.

Over in the Wallapai Springs section the Myers-Frost strike is being operated in a small way, several of the owners having to look after the opening up of water holes for a larger number of cattle that have come into the ranges in that neighborhood. As soon as this is done work will again be resumed and drifts run along the vein into the rich ore. The shaft is now at a depth of 50 feet and shows about a foot of ore that will run above 150¢ to the ton in gold and silver. Considerable of the ore is now on the dump and can be sent to the mill. Drifting has opened up a good sized vein of fair milling ore, aside from the rich streak.

The activity displayed among the mines of Chloride owing to the rich strike of ore in the Tennessee is remarkable. Every mine that shows the smallest kidney of shippable ore in the camp is being looked after and there is probability of many of the large low grade properties being taken over and worked. Many mining men from Mexico are looking at the mines of that section and appear well pleased with the outcrops.

Health a Factor in Success.

The largest factor contributing to a man's success is undoubtedly health. It has been observed that a man is seldom sick when his bowels are regular—he is never well when they are constipated. For constipation you will find nothing quite so good as Chamberlain's Tablets. They not only move the bowels but improve the appetite and strengthen the digestion. They are sold by all dealers.

Parker Mines to be Operated.

E. S. Osborne, favorably known in mining circles of the state as a consulting engineer, and who has been associated with the New Mexico Lead and Copper Company, in the capacity of directing preliminary operations, left for Parker a few days ago to begin the exploitation of his gold and copper properties, by establishing two camps.

The Arizona Pride and the State of Maine groups are to be energetically operated and the purpose is to maintain two camps during the summer. The former company owns fourteen claims and the latter twenty-eight, both situated about fourteen miles east of Parker, in a belt that shows unquestioned mineral possibilities. The Maine group has been prospected with several shallow shafts, and after a main working base has been established churn drilling will follow. The Pride group has over 800 feet of development, and has been a shipper of high grade ores.

Mr. Osborne is decidedly optimistic over the future of both properties, and will make his headquarters at the camps that are to be rehabilitated and maintained on a permanent basis.—Prescott Journal-Miner.

The survey of the wagon road from Yucca to Topock is almost completed and it is the intention of the State Engineer to begin active work on this road east from Topock. The building of the road is a necessity to travel, and when completed will be one of the most used lines of travel in the State.

Dr. John R. Whiteside has gone to Globe, where he is attending the meeting of the State Medical association.

A visit to the Hull Tuesday showed that Mr. Hull is continuing his persistent hunt for pay bodies of ore on this valuable property. At the present time they are making preparations for sinking a winze at a point 5,000 feet from the entrance of the Hull Tunnel. The work is to be done on a good sized ledge that was cut by the tunnel at this point. The Hull Tunnel is now in more than one mile, and will be continued through the hill to the claims owned by Mr. Hull on the north side of the United Verde.—Jerome News.

Our Great Grocery Strength

lies in our ability to keep quality up while we hold prices down. How thoroughly we do this you will realize if you try us with an order. Have it consist of those groceries of which you are the best judge of qualities and values. That will be a strong test, but we welcome it.

"IT WOULDN'T BE A BAD IDEA TO SEE US FIRST."

So-called "luck" is frequently nothing but hard common sense. Some rich men are said to be lucky, when really they have only been sensible and saved, instead of spending their earnings. Get the habit of banking your spare cash, and you will never regret it. Bank with us and you will easily earn your own independence and have the satisfaction of seeing your fortune grow.

Duncan B. Melver died at the Truxton Canyon Indian school last Saturday morning, death being due to chronic intestinal nephritis. Deceased was aged about 78 years at the time of his death. He was born in Canada and came to the United States in early life, serving in the confederate army during the civil war. For a number of years he engaged in merchandise pursuits at Puy, California. Owing to asthmatic troubles he came to this county and was stopping with his brother, J. E. Melver, at the Indian school. He was an honorable, genial man and had many friends on the coast. The remains were brought to Kingman and interred in the local cemetery last Monday.

Mr. and Mrs. S. W. Alger are visiting in Kingman, having come up from Yucca for a few days.

Lost

Check No. 115 for \$155.58 drawn in favor of Victor Velarde, by Union Basin Mining Co. on Arizona Central Bank, has been lost and payment stopped at bank. All persons are warned not to negotiate such check.

For the Weak and Nervous.

Tired-out, weak, nervous men and women would feel a ambitious, energetic, full of life and always have a good appetite, if they would do the sensible thing for health—take Electric Bitters. Nothing better for the stomach, liver or kidneys. Thousands say they owe their lives to this wonderful home remedy. Mrs. O. Rhine-vault, of Vestal Center, N. Y., says: "I regard Electric Bitters as one of the greatest of gifts. I can never forget what it has done for me." Get a bottle yourself and see what a difference it will make in your health. Only 50¢ and 1.00\$. Recommended by H. H. Watkins.

Advertised Letters

The following letters remain unclaimed for in the Postoffice at Kingman, Ariz., for the week ending May 24, 1913. If not called for within two weeks will be sent to the Dead Letter office, Washington, D. C.

Gimball Bros., J. H. Sheldon, Mr. Samuel Montoya, Mr. Ruba McKoshie, Mr. C. C. Hutchinson, Dr. Alice L. Farley, C. A. Anderson, Frank Reed. Parties calling for letters please say advertised.

J. N. COHENOUR,
Postmaster.

Coming, June 6, 7 and 8

Dr. L. M. Swigert of the Swigert Bros. Optical Co., Denver, will be in Kingman, at the Beale Hotel, on our regular quarterly trip, three days, June 6, 7 and 8th.

If there is anything the matter with your eyes, don't neglect them when you can have them examined accurately and scientifically and can get good ground glasses from an exclusive established optical house, whose reputation and equipment gives you the highest grade of service. The satisfaction of our work is well known to the many people of this vicinity who have received our services during the past ten years.

Remember the Dates

Women's Oxfords—Attractive in Style Perfect in Fit

During the warm Spring and Summer months no style of footwear is more appropriate in point of general utility than

the oxford. This is evidenced by its continued popularity.

The difficulty is to obtain real style and perfect fit at the same time.

This difficulty is overcome for those women who wear UTZ & DUNN Co. oxfords—the most stylish, the best fitting.
